Project Outline:

SeedStarter is a fictional resource for planning and maintaining a garden. The main objective is to provide a guideline for planning and maintaining a personal garden.

Layout Prototype:

Each page will have the same header and footer.

The layout will consist of 4 simplified tabs:

- Getting started
- Seasons
- Common plants
- Planning tools

Each page will consist of a more comprehensive sub-navigation menu with a bootstrap scrollspy style layout and corresponding information in the main area. A combination of grids, cards and accordions will provide information in a concise easy to read/navigate fashion.
